# WEATHER OF CONCERN

## Weather of Concern

- There is currently no weather of concern

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/wwa\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php)

## **WEATHER SYNOPSIS BY REGION**

### **NORTHERN CALIFORNIA**

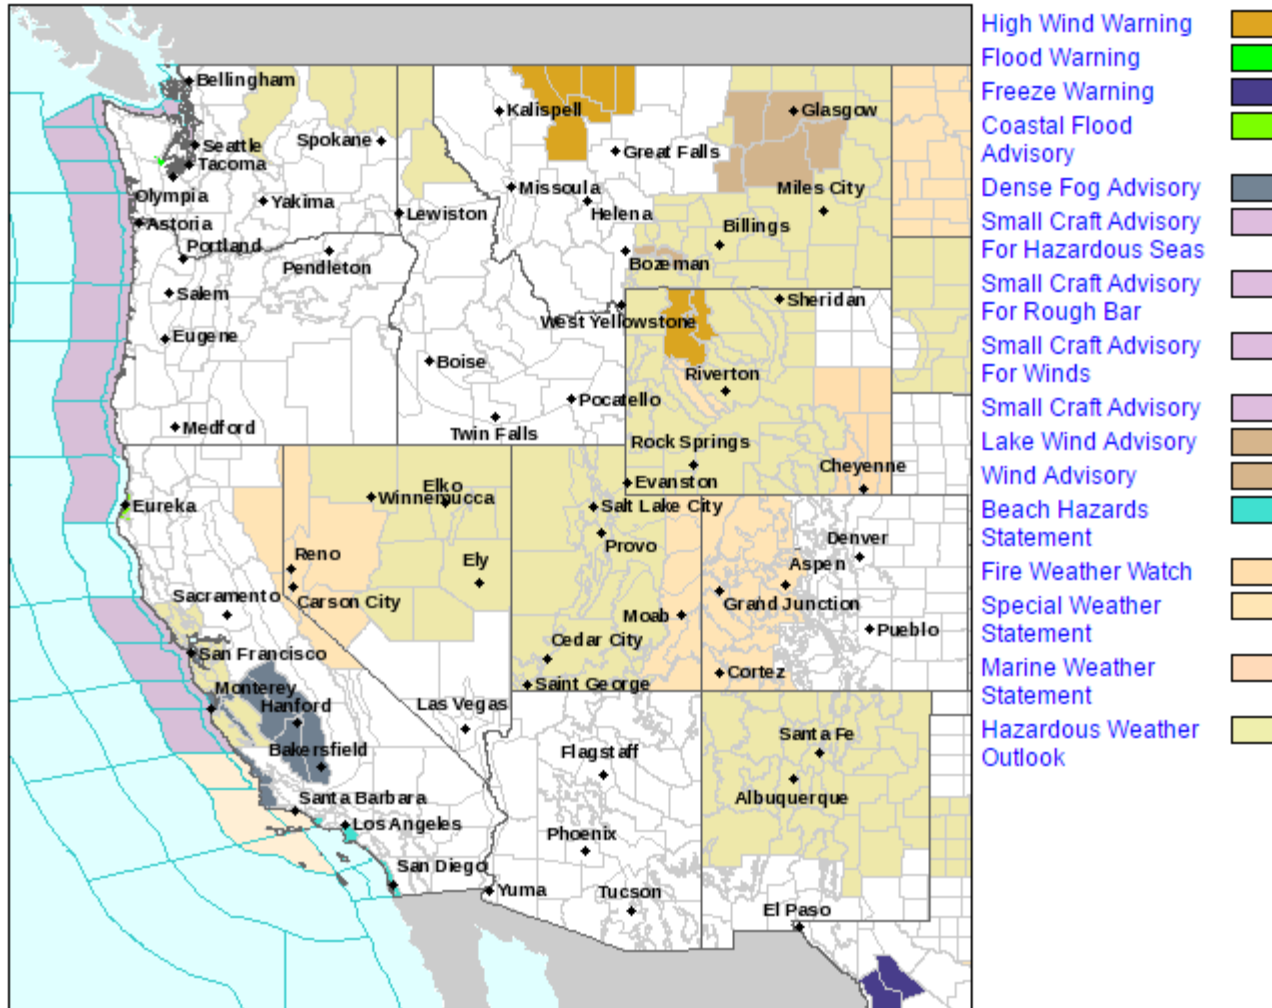

Weak high pressure will bring dry conditions. A cold front will bring another chance for rain today into Tuesday and much colder interior temperatures mid week. Dry and mild weather will continue through tonight with patchy Valley fog in the mornings. A weather system will move through later Tuesday into Wednesday, bringing cooler temperatures, light Valley rain, and mountain snow down to 4000-5000 feet. Forecasts have trended drier over the past few days so only a few inches of snow accumulation is expected at this time near pass levels. A stronger cold front will bring more rain and gusty south winds on Friday and Saturday.

### **SOUTHERN CALIFORNIA**

High pressure will strengthen aloft with high temperatures 10 to 20 degrees above normal. Well above normal temperatures and mostly clear skies are expected today due to high pressure aloft and weak offshore flow. A significant cooling trend will begin on Tuesday as a trough of low pressure approaches, with below normal temperatures for mid-week. Cooler Tuesday through Thursday as a trough of low pressure moves inland along the West Coast. Temperatures may return to near normal by late next week as high pressure returns.
